Subject: RE: EPA Midwest

Hello John,

I'm not sure I'm going to get to review this application before January. Section 59.624(e) states (my emphasis), "(e) For emission families already covered by a certificate of conformity and you send us a request to amend your application, ***you may sell and distribute the new or modified configuration before we make a decision under paragraph (d) of this section***, subject to the provisions of this paragraph. If we determine that the affected configurations do not meet applicable requirements, we will notify you to cease production of the configurations and any containers from the new or modified configuration will not be considered covered by the certificate. In addition, we may require you to recall any affected containers that you have already distributed, including those sold to the ultimate purchasers. Choosing to produce containers under this paragraph (e) is deemed to be consent to recall all containers that we determine do not meet applicable emission standards or other requirements and to remedy the nonconformity at no expense to the owner. If you do not provide information required under paragraph (c) of this section within 30 days, you must stop producing the new or modified containers."

Life's too short. Eat dessert first!

John,

Good morning and complete. Confirmation can be found below.

Note – Julia may need to be informed that the test report resides within VERIFY.

Thanks,

Andy Meloeny
